CAREER OBJECTIVE

Motivated 2nd-year Diploma Computer Engineering student with hands-on experience building and deploying full-stack web applications. Seeking an internship in Software Development or Data/AI/ML to apply my skills in Python, JavaScript, and cloud-deployed systems while contributing to real-world projects.

EDUCATION

Seshasayee Institute of Technology

Diploma in Computer Engineering

Expected 2027

GPA: 8.6 / 10 (86.6%)

Sribala Vidhyamandir Matric. Hr. Sec. School

SSLC — Tamil Nadu State Board

2023

76.6%

TECHNICAL SKILLS

Languages & Frameworks

Python

Java

C

JavaScript

PHP

Next.js

Web & Databases

HTML5

CSS3

MySQL

MongoDB

Tailwind

Chart.js

Tools & DevOps

Git

Docker

Vercel

InfluxDB

Grafana

WebSockets

PROJECTS

Empower — Employee Management System

Solo Developer

PHP 8.2 • MySQL/MariaDB (TiDB Cloud) • HTML5/CSS3/JS • Chart.js • Vercel

- Full-stack platform for managing employee records, attendance, leave requests, and payroll processing.
- Implemented role-based access control (Admin, HR, Manager, Employee) with bcrypt password hashing and SQL injection prevention.
- Architected a custom PHP session handler to enable serverless deployment on Vercel.

Live: empower1-ten.vercel.app • GitHub: [honey-aaqil/empower1](https://github.com/honey-aaqil/empower1)

Library Management System v2

Backend Developer

PHP • MySQL/MariaDB (TiDB Cloud) • PDO • Animate.css • Vercel

- Built a full-featured library platform enabling admins to manage book inventories and members to place book requests.
- Designed relational database schema and implemented secure PDO-based authentication with SSL connections.
- Developed a custom database-backed session management system for persistence in serverless environments.

Live: library-v2-blond.vercel.app • GitHub: [honey-aaqil/library-v2](https://github.com/honey-aaqil/library-v2)

AquaCart — E-Commerce Platform (In Development)

Solo Developer

Next.js • MongoDB (Mongoose) • NextAuth.js • WebSockets • Tailwind CSS • Brevo SMTP

- Developing a full-stack e-commerce platform with product catalog, one-click ordering, and real-time admin notifications via WebSockets.
- Implemented secure user registration with email and phone verification using Brevo SMTP (Nodemailer).

Live: aquacart.vercel.app • GitHub: [honey-aaqil/aquacart](https://github.com/honey-aaqil/aquacart)

TITAN TRAFFIC — Intrusion Detection System

Hackathon — Team of 3

Python • Docker & Docker Compose • tshark (Wireshark CLI) • InfluxDB 2.x • Grafana

- Built a real-time IDS and Zero-Trust policy drift detection engine that monitors network traffic in Docker environments.
- Architected policy evaluation logic and scoring system; captured live packets using tshark, evaluated against a Golden Configuration.
- Integrated InfluxDB pipeline and Grafana dashboards for real-time security drift score visualization.
